

Assignment - 4

Assignment Date	24 October 2022
Student Name	Nambiraaja T
Student Roll Number	111519205029
Maximum Marks	2 Marks

Question 1:

Pull an image from docker hub and run it in docker playground.

```
2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
   (amd64)
3. The Docker daemon created a new container from that image which runs the
   executable that produces the output you are currently reading.
4. The Docker daemon streamed that output to the Docker client, which sent it
   to your terminal.

To try something more ambitious, you can run an Ubuntu container with:
$ docker run -it ubuntu bash

Share images, automate workflows, and more with a free Docker ID:
https://hub.docker.com/

Question 2:

Create a docker file for the jobportal application and deploy it in Docker desktop application.

DOCKERFILE:

```
1 FROM python:3.8-buster
2
3 WORKDIR /app
4
5 COPY requirements.txt /app/
6
7 RUN pip install -r requirements.txt
8
9 COPY . /app/
10
11 RUN cp .env.dev.sample .env
12
13 EXPOSE 8000
14
15 RUN chmod +x entrypoint.sh
16
17 CMD ["sh", "entrypoint.sh"]
```

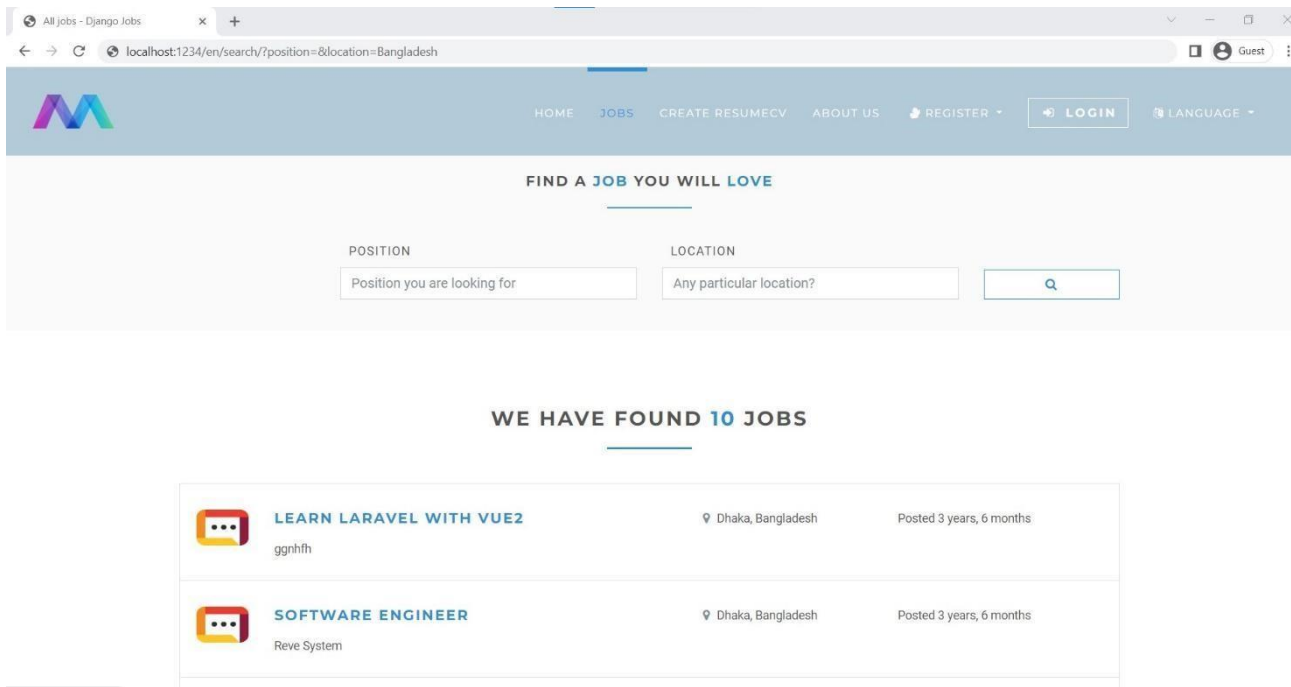

DEPLOYMENT OF JOBPORTAL APPLICATION:

The screenshot shows the Docker Desktop interface. On the left is a sidebar with navigation options: Containers, Images, Volumes, Dev Environments (marked BETA), Extensions (marked BETA), and Add Extensions. The main area is titled 'Containers' and includes a toggle for 'Only show running containers' and a search bar. Below this is a table listing the containers:

	NAME	IMAGE	STATUS	PORT(S)	STARTED	ACTIONS
<input type="checkbox"/>	agitated_neumann 918d20882039	icr.io/helloapp/ibm:latest	Exited (137)	49160:8080		
<input type="checkbox"/>	jolly_turing b62c0712bdd3	jobportalapplication:latest	Running	1234:8000	4 minutes ago	

At the bottom right of the main area, it says 'Showing 2 items'. The bottom status bar shows 'RAM 3.06GB', 'CPU 0.57%', 'Connected to Hub', and 'v4.13.0'.

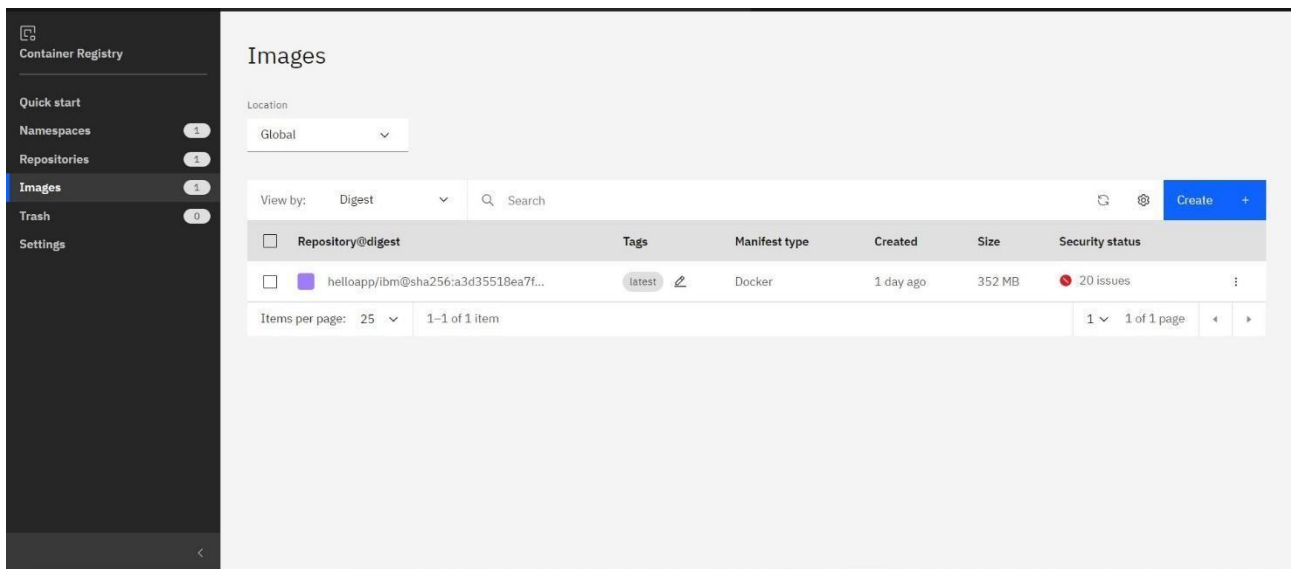

OUTPUT:

Question 3:

Create a IBM container registry and deploy helloworld app or jobportapp.

IBM CONTAINER REGISTRY DEPLOYMENT:

OUTPUT:

Question 4:

Create a Kubernetes cluster in IBM cloud and deploy helloworld image or jobportal image and also expose the same app to run in nodeport.

Creating kubernetes cluster in IBM cloud and exposing nodeport:

A screenshot of the IBM Cloud Kubernetes Dashboard. The cluster is named 'mycluster-free' and is in a 'Normal' state, expiring in 29 days. The 'Worker nodes' tab is selected, showing a table with one node.

<input type="checkbox"/>	Name	Status	Worker pool	Zone	Private IP	Public IP	Version
<input type="checkbox"/>	0000008c	Normal	default	Milan 01	10.144.187.51	159.122.179.68	1.23.12_1549

Output:

The image displays three distinct resume templates arranged horizontally. Each template is presented in a preview window that includes a 'FREE' label in a green box and a 'BUILDER' button in a blue box at the bottom.
 - **Resume 1:** Features a modern design with a purple header and sidebar. The main content area is white. It includes sections for 'Your Full Name', 'Job Position', 'SUMMARY', 'SKILLS', 'EDUCATION', and 'ACTIVITIES'.
 - **Resume 2:** Has a clean, minimalist aesthetic with a white background and teal accents. It includes sections for 'Your Full Name', 'Job position', 'SUMMARY', 'SKILLS', 'EDUCATION', and 'ACTIVITIES'.
 - **CV:** Features a minimalist design with a white background and orange accents. It includes sections for 'YOUR NAME', 'Job position', 'SUMMARY', 'SKILLS', 'EDUCATION', and 'ACTIVITIES'.
